

# Exam 70-333: Deploying Enterprise Voice with Skype for Business 2015

NOTE: The bullets that appear below each of the skills measured are intended to illustrate how we are assessing that skill. This list is not definitive or exhaustive.

NOTE: In most cases, exams do NOT cover preview features, and some features will only be added to an exam when they are GA (General Availability).

## Objective Domain

### 1. Plan and design Skype for Business with Enterprise Voice (30-35%)

- 1.1 Design Enterprise Voice topology
- 1.2 Design call routing and Public Switched Telephone Network (PSTN) connectivity
- 1.3 Design voice applications
- 1.4 Design unified messaging (UM)
- 1.5 Plan for network readiness and optimization
- 1.6 Design network services for Enterprise Voice
- 1.7 Model and analyze Skype for Business traffic per site
- 1.8 Analyze policies and historical data network usage
- 1.9 Plan and analyze simulation traffic results, and make recommendations

### 2. Deploy and configure Enterprise Voice (30-35%)

- 2.1 Configure network services for Enterprise Voice
- 2.2 Configure voice applications
- 2.3 Configure call routing
- 2.4 Configure unified messaging (UM) for Skype for Business and Cloud Voicemail
- 2.5 Configure Enterprise Voice client features

### 3. Manage and troubleshoot Enterprise Voice (30-35%)

- 3.1 Troubleshoot call setup and teardown
- 3.2 Troubleshoot Enterprise Voice quality issues
- 3.3 Troubleshoot Enterprise Voice configuration
- 3.4 Troubleshoot and analyze Enterprise Voice applications
- 3.5 Troubleshoot universal communications (UC) devices and peripherals
- 3.6 Monitor and manage Skype for Business
